## **New Lusty EMS Tipper Built for Grain Haulage**

Lusty EMS has produced a new semi- tipper specifically for the needs of grain carters, offering a high quality aluminium tipping trailer that maximizes payload, at a competitive price.

Configured as a 36' X 6' Tip-over-axle semi, the GrainMaster™ trailers have been produced as stock units, ready to roll into immediate action for grain haulage work.

Produced to all the high quality industry standard specs expected from a Lusty EMS unit, they feature Hendrickson HT series suspension and two-way tailgates with grain door, fitted with stainless steel grain locks.

The units are constructed from 5mm aluminium plate for side walls and 6mm aluminium flooring.

Alcoa 285 PCD alloy rims and a PVC quick release roll over tarp fitted with pelmet ends are standard, as are Hella combination rear lights, dual tyre carrier, stainless steel toolbox, ABC brake system, internal steps, Itco hydraulic hoist, Bisalloy 16mm skidplate, water tank, and Maxus 10 stud axles and landing legs.

They can be supplied with a choice of chassis paint colours and come with a two year warranty.

GrainMaster units are available now from Lusty EMS dealers nationally.
